ST

Figure 1 displays 20 plots showing ST (Sustained Transient) waveforms. Each plot compares a black line (original waveform) and a red line (shifted waveform). The x-axis represents Time from pick/window center (s), ranging from -4 to 10. The y-axis represents amplitude. The plots are arranged in a 20x2 grid. The first 10 rows show CC values from 0.73 down to 0.24, and the next 10 rows show CC values from 0.24 down to 0.90. The sign and shift values vary across the rows.
